

COURT RULES OUT WILL ON TELEGRAM

(By Associated Press)
SAN FRANCISCO, Dec. 7.—A will written by Mrs. Daisy Selig in pencil on a telegraph blank was thrown out of court here because in making out the date she utilized the printed "19" on the blank and merely added "20" after them, instead of having the four figures in her own handwriting. The court said that this invalidated the will because the entire document should have been in her own handwriting. By the court's action her husband, Maurice Selig, and her mother will receive all of a \$9,000 estate, two pieces being friends who were killed in the war and jewelry. Mrs. Selig, who was killed in an automobile accident near Petaluma, California, September 22, wrote the will while a passenger on a train to Los Angeles last year.

REWARD

Will pay \$250 for the arrest and conviction of one or all the parties who broke into the staff house of the Apex Mines company and took a 1914 p. motor and starting box. Will pay a further reward of \$100 for the return of the motor and starting box. A further reward of \$100 will be paid for information leading to the arrest and conviction of one or all the guilty parties.

SKULL FOUND IN RHODESIA OLDEST KNOWN

LONDON, Dec. 7.—Scientists say the Darwinian theory that Africa may have been the original home of the human race received partial corroboration from the discovery just made in northern Rhodesia of a fossilized skull which gives a new orientation to the early history of primitive man.

The skull, which is complete save for the lower jaw, resembles that of the ape man (pithecanthropus erectus) discovered in Java in 1892 which has been regarded as the most primitive human skull known until now. The Java skull, however, lacked a face. In this respect, the Rhodesian fossil reveals a type curiously similar to what is known as the Gibraltar skull.

Moreover, a collar bone, a leg bone and part of a hip bone believed to belong to the skull have also been unearthed, and these may enable anatomists to reconstruct the main parts of the whole Rhodesian skeleton.

The scene of the discovery was the "Bone Cave" of the Broken Hill mine, already famous for the beauty of its stalactites and stalagmites and for the remarkable fact that the lime of which they were originally composed has been largely replaced by phosphates of zinc and lead.

It was the commercial value of these formations that led to the transformation of this cave into one of the strangest mines ever worked. The floor consisted of a mass of fossilized remains of elephants, lions, leopards, rhinoceros, hippopotami, antelopes, birds, bats and small mammals. Hundreds of tons of these animal remains have been removed but no trace of man was discovered until a depth of 50 feet below water level was reached, when the bone described were found surrounded by soft, friable lead conglomerate.

AIR AND SEA FORCES TO COOPERATE

(By Associated Press)
LOS ANGELES, Dec. 7.—Fleet gunner officers and air squadron of fliers are cooperating here in working out naval anti-aircraft problems that promise to furnish gunnery exercises in December that will startle the world in their thrill, according to information which has percolated from the conferences of the officers. Six F-51 type naval sea-planes, an air squadron under command of Lieut-Commander P. N. L. Bellinger, recently came here from San Diego, Captain H. V. Butler, commander of air squadrons, Pacific Fleet, also joined the forces in consultation.

Targets hurtling through the air at sixty miles or more an hour, will furnish something spectacular in the new anti-aircraft exercises. Whether these targets are to be towed as kite targets by the airplanes, or whether they are to be released by airplanes, are points which have not been made public, but inferences are that the kite target will be used in order to provide the moving speed.

Highly important in the exercise will be the aerial photography, to record the results of the anti-aircraft fire. A large force of mechanicals, photographers, pilots and attendants of the naval air force have been brought here on the tender Astor.

Extensive rehearsals will precede the actual firing, and officers, it is said, expect that results from these tactical exercises will bring forth information of greater value in determining aerial offensive and defensive possibilities than the recent bombing of German warcraft off Virginia Capes.

WOMEN PAROLED FROM THE PRISON
Marie Rogers, an inmate of the state prison the past few months was paroled yesterday. She was received from Eureka county to serve a term of one to five years for second degree burglary. Eva Shelton, the Rogers woman's partner in the crime, was paroled two weeks ago. The action was taken by the board on the recommendation of the Eureka county authorities.

The Nevada prison is without women prisoners since the release of Marie Rogers.

RED CROSS WORKING FOR HEALTHIER U. S.

Thousands Aided by Instruction in Care of the Sick, Food Selection and First Aid.

How the American Red Cross guides thousands of persons to health is shown in a summary of the society's activities in the health field based upon the annual report for the last fiscal year. Through its Nursing Service, its Home Hygiene and Care of the Sick courses, nutrition classes, First Aid classes, Life-Saving classes and Health Centers and in numerous other ways designed to acquaint masses of citizens with proper methods of living the Red Cross carried its message of health into all parts of the country.

The work of the Red Cross during the war in its traditional field of nursing, furnishing the military and naval establishments of the nation with 19,877 nurses, is well known. And there are today 37,787 nurses registered with the American Red Cross and subject to call in emergency. During the fiscal year, 1,551 Red Cross nurses were accepted for assignment to Government service, 888 by the Army and Navy and 1,163 by the United States Public Health Service.

In addition to the nurses enrolled by the Red Cross for Government service, the Red Cross itself employed a total of 1,348 public health nurses in the United States and Europe. By far the greatest number was employed in the United States, 1,257, while 81 were in foreign service.

Home Hygiene and Care of the Sick classes, giving thorough instruction in the proper care of the sick in instances where the illness is not so serious as to require professional nursing care, during the fiscal year numbered 5,179. A statistical picture of the Red Cross operations in this field follows:

New classes formed during year	5,179
Classes completed during year	6,298
New students enrolled	101,093
Students completing course	78,432

What the Red Cross accomplished in giving proper instruction through its Nutrition Service is indicated by the following table:

New classes formed during year	142
Classes completed during year	158
New students enrolled	2,341
Students completing course	2,013

In addition to the above, a total of 22,006 children were given instruction in the proper selection and preparation of foods.

Through its 260 Health Centers, the Red Cross reached 90,252 persons. In these Health Centers, 4,015 health lectures were given and 780 health exhibits held.

In the United States last year, 75,432 persons were killed and 3,500,000 injured in industrial accidents. To prevent this enormous waste the Red Cross held 5,100 first aid classes with a total of 104,000 students enrolled.

RED CROSS RESCUED 600,000 FROM DEATH

Spent \$1,200,000 for Relief of Famine Sufferers in China Last Year.

To help overcome conditions of acute distress in five famine stricken provinces of Northern China, where millions of persons were affected by an unprecedented shortage of food, the American Red Cross during the last fiscal year spent more than \$1,200,000. \$1,000,000 of which was contributed directly by National Headquarters and the remainder by various groups interested in the welfare of China.

Through the wide relief operations thus made possible it is estimated that more than 600,000 famine sufferers were saved from starvation.

To the end that similar prompt relief measures by the organization may always be possible the Red Cross is asking continued support by the American people by universal renewal of membership at the Annual Red Cross Roll Call, November 11 to 24.

The method of relief employed by the American Red Cross in its operations in China was particularly effective, for in addition to saving hundreds of thousands of lives it provided China with more than 900 miles of permanent roads that are sorely needed to prevent a recurrence of famine. At one time the Red Cross employed 74,000 Chinese workmen, paying them in food for themselves and dependents, this food being brought in from Manchuria and elsewhere.

ONE DOLLAR ANNUAL DUES IN THE AMERICAN RED CROSS MAKES YOU A PARTICIPANT IN RELIEF WORK FOR THE HELPLESS THAT GIRDES THE GLOBE. ANSWER THE ANNUAL RED CROSS ROLL CALL NOVEMBER 11-24, 1921.

Call Mrs. Sylvia Grochong, phone 806, when you need music for dances or parties. The Grochong orchestra is composed of real musical artists. 86-11.

NEW GENTRY GOOD THING FOR ENGLAND

(By Associated Press)
LONDON, Dec. 7.—The advent of a new "landed gentry" in England since the war is made plain by "Burke's", an annual of reference on that subject which has reappeared after a break of seven years.

Over 190 names of old landowners have disappeared since the last edition, and their places have been taken by double that number of newcomers.

In the preface, the editor remarks: "Much as the passing of old families from the land, or the diminution of their holdings, is to be regretted, the rise of a new class of landed gentry, possessed of means enabling them to develop estates which had become impoverished through the misfortunes of their previous owners, cannot be without benefit to the country."

NEVADA SUNSHINE CO. TO MAKE SHIPMENT

O. W. Jones, president of the Rochester Silver Corporation and the Nevada Sunshine Mines company, after spending some time here looking after the latter company's developments in the Sunshine district, sixteen miles south of Winnemucca, departed yesterday morning for his home at Chicago. Mr. Jones is well pleased with the ore showing made in the Sunshine estate and has great faith in the outcome of the property. Considerable development work has been done on the holdings and a fine body of rich ore is now being followed in the workings. A long tunnel was sent in and a drift from a winze sunk from the tunnel level has penetrated the ore body for a considerable distance. A shipment of ore is now being made from the estate.

Our job department is unequaled in southern Nevada. A trial order will make you a regular customer.

PREPARE EXHIBIT IN RATE CASE

J. P. Shaughnessy, chairman of the Nevada public service commission, is engaged in preparation of exhibits to be used in behalf of Nevada shippers at a hearing to be conducted in Reno, December 12th, by Examiner Diaque, of the interstate commerce commission. This preparation is being made for the purpose of fighting the revived long and short haul battle. Under the proposed schedule rates on structural steel and iron products will be one dollar from Pittsburg to San Francisco, and \$1.66 from Pittsburg to Reno and other Nevada towns. Mr. Shaughnessy says.

Frank Warren, the commission's reporter is in Reno assisting E. H. Walker, manager of the Reno Chamber of Commerce traffic bureau in preparing certain parts of the case for the shippers of this state.

The Reno hearing will follow a hearing to be held by Examiner Diaque in San Francisco, December 8th.

BUY LARGE NUMBER OF COYOTE AND CAT HIDES

A. L. Hackney, fur buyer of San Francisco, was in Winnemucca Saturday with a small truck load of furs, which he said was valued at \$3000. The lot consisted mostly of coyote and wild cat hides which were purchased from different parts in the northern part of the county. Mr. Hackney made an express shipment of two large bales of the hides to his place of business at Nampa.

Burglars Don't Seek the Light!

Darkness is their stock in trade. They work by stealth—unheard and unseen—their movements cloaked in secrecy. It's honest folks that see the light. They are the only ones who can risk it.

It's the same way in business. The merchant who is not sure of his goods does not dare to advertise. Advertising would hasten the end of his business career—put him to a test he could not meet.

The merchant who advertises deliberately invites your inspection. He tells you about his product and then lets it stand on its own merits. You can depend on him. He knows his product is good.

That's one reason why it pays you to read the advertisements in THE BONANZA. It is through advertising that you are able to keep in touch with the good things that progressive business houses are spending their money to introduce and keep before you.

Advertisements are interesting, instructive and profitable. They throw a powerful light on the very things that concern you most. READ THEM!
